OBJECTIVE

- I am an Entry-level Software Engineer candidate with a B.S. in Computer Science (concentration in Software Engineering) seeking a role to apply skills in full-stack and back end development.
- Expected graduation June 30, 2026; experienced with web applications, cloud deployment, and traditional AI projects in academic and personal settings.

EDUCATION

University of Texas at San Antonio – San Antonio, TX

Bachelor of Science in Computer Science, Concentration in Software Engineering

- Expected Graduation: August 2026
- Overall GPA: 2.99 · Concentration GPA: 3.66
- Relevant Coursework: Computer Architecture, Principles of Cybersecurity, Data Structures, Software Engineering

Paetow High School – Katy, TX

- GPA: 3.34 · Graduated Spring 2021
- Activities: Chess Club, Art Scholastics Competition, AP Computer Science

TECHNICAL PROJECTS AND EXPERIENCE

Personal Website & API – Full Stack Developer

University of Texas at San Antonio · Fall 2025 – Spring 2026

- Developed a full-stack personal website, owning both front-end UI and back-end logic
- Configured cloud infrastructure using AWS EC2 and Azure virtual machines for hosting and testing
- Deployed web hosting with Nginx and implemented server-side functionality in PHP
- Designed and tested relational databases using MySQL and phpMyAdmin
- Built responsive front-end and interfaces using HTML, CSS, JavaScript, and Bootstrap 3.4
- Implemented a REST-style API in PHP to perform CRUD operations on the database

Virtual Reality Demo – Traditional AI Programmer

University of Texas at San Antonio · Fall 2025

- Implemented enemy AI using behavior trees to control a monster that tracks and hunts the player in a VR Mars environment
- Collaborated on a senior design team project using GitHub for version control and code reviews
- Integrated AI behavior with a Meta Quest headset experience where players explore Mars and complete tasks while avoiding the AI-controlled enemy

Windows System Administration Project - System Administrator

University of Texas at San Antonio · Fall 2025

- Created Windows Server 2016 environments using VirtualBox machines
- Configured Active Directory, including organizing units, security groups, and user accounts
- Wrote Windows PowerShell scripts to automate the creation of groups and accounts in Active Directory

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, C#, C++, JAVA, PHP, Go, GDScript
- **Web:** HTML, CSS, Bootstrap, REST-style APIs
- **Databases:** MySQL, phpMyAdmin
- **Cloud & Tools:** AWS, Azure, Nginx, GitHb, VirtualBox, Android Studio, Flutter
- **Systems & Scripting:** Windows Server, Active Directory, PowerShell
